

RainCity Token (\$RAIN) - Whitepaper

■ Overview

RainCity is a decentralized ERC-20 token built on the Polygon blockchain, designed to empower community

■ Blockchain

- Network: Polygon
- Standard: ERC-20
- Supply: 1,000,000 RAIN (capped, deflationary)
- Contract Address: 0xYourTokenAddressHere

■ Tokenomics

- 60% - Community Airdrop & Incentives
- 20% - Team & Operations (vesting 12 months)
- 10% - Liquidity Pool
- 10% - Ecosystem & Partnerships

■ Security & Trust

RainCity is built with audited OpenZeppelin libraries, ensuring safe smart contract patterns. No hidden mint f

■ Roadmap

Phase 1 - Genesis

- Token smart contract deployed
- Launch landing site + whitepaper
- Airdrop campaign + community onboarding

Phase 2 - Growth

- DEX listing on QuickSwap
- NFT integration for community roles
- Launch RainCity DAO

Phase 3 - Utility

- Staking + rewards system
- Creator grants and digital art support
- Cross-chain expansion (Arbitrum, BSC)
